Copyright, Canada, 1934, by Henderson Directories Limited, 279 Garry St., Winnipeg

Introductory

The present volume constitutes the 1934 edition of Henderson's Directory of Lethbridge. The work embodies a complete epitome of the civic, commercial, social, and industrial interests and activities of the municipality. It is a modern Directory in all its parts and includes all the essential features which have been proven so satisfactory to our patrons in previous issues; these have been retained and amplified, and improvements have been added as suggested by experience in order to add to the value and usefulness of the Directory, thus fully meeting the requirements of patrons; the approbation and continued patronage accorded the work are constant incentives to better service.

The publication has had the benefit and advantage of the complete organization and resources of the publishers, and of the skill and experience of their corps of enumerators and compilers added to the courteous co-operation of citizens, in the production of the volume.

THE DEPARTMENT OF MISCELLANEOUS INFORMATION

THE DEPARTMENT OF MISCELLANEOUS INFORMATION is included in pages 9 to 56 and contains data concerning City, Provincial, and Federal Government offices, commercial organizations, cemeteries, churches (denominational and miscellaneous), colleges and schools, hospitals, homes and asylums, building exchange and associations, institutes and societies, libraries, military organizations, public schools, secret societies, etc.

THE STREET AND AVENUE GUIDE

THE STREET AND AVENUE GUIDE is embraced in pages 57 to 104. In this feature the names of all streets and avenues are arranged alphabetically and numerically, giving the location, number on the street and showing the occupant.

The intersecting streets are shown in the order that they come.

THE ALPHABETICAL DIRECTORY

THE ALPHABETICAL LIST OF NAMES of citizens, business firms and corporations covers pages 105 to 280.

THE CLASSIFIED BUSINESS DIRECTORY

THE CLASSIFIED BUSINESS DIRECTORY occupies pages 281 to 327 and exhibits the various manufacturing, mercantile, and professional names, compiled under headings appropriate to the class of industry or profession followed.

ADVERTISING LETHBRIDGE

An important function of the Directory is to set forth the characteristics and advantages of the city as a place of residence, as a business location, as an industrial site, and as an educational centre. The Directory acts as a mirror, reflecting all that is noteworthy in the city in the above respects. In order to spread this information regarding the city broadcast over the country, the publishers have placed copies of this issue of the Directory in the directory libraries, where they are readily available for reference use by the public. There they serve as perpetual advertisements of Lethbridge, for business men the country over realize that the City Directory represents the community as it really is.

The publishers take this opportunity of thanking the citizens for valuable assistance rendered in the way of furnishing information concerning themselves, their friends and their business interests for this Directory, and also the public-spirited and progressive business and professional men for support given in the way of patronage.

Respectfully, The Publishers

HENDERSON DIRECTORIES LIMITED.

Lethbridge, Alberta

Lethbridge, Alberta is situated fifty miles north of the international boundary line, 764 miles west of Winnipeg. It is a prairie city on the banks of the Old Man River, just east of the Canadian Rockies, on the Crow's Nest Division of the Canadian Pacific Railway, and is the commercial and agricultural centre and supply point of Southern Alberta and the Crow's Nest Pass coal fields. It is the centre of large coal mining operations. The development of coal mining in this vicinity is the largest in Canada, west of Nova Scotia.

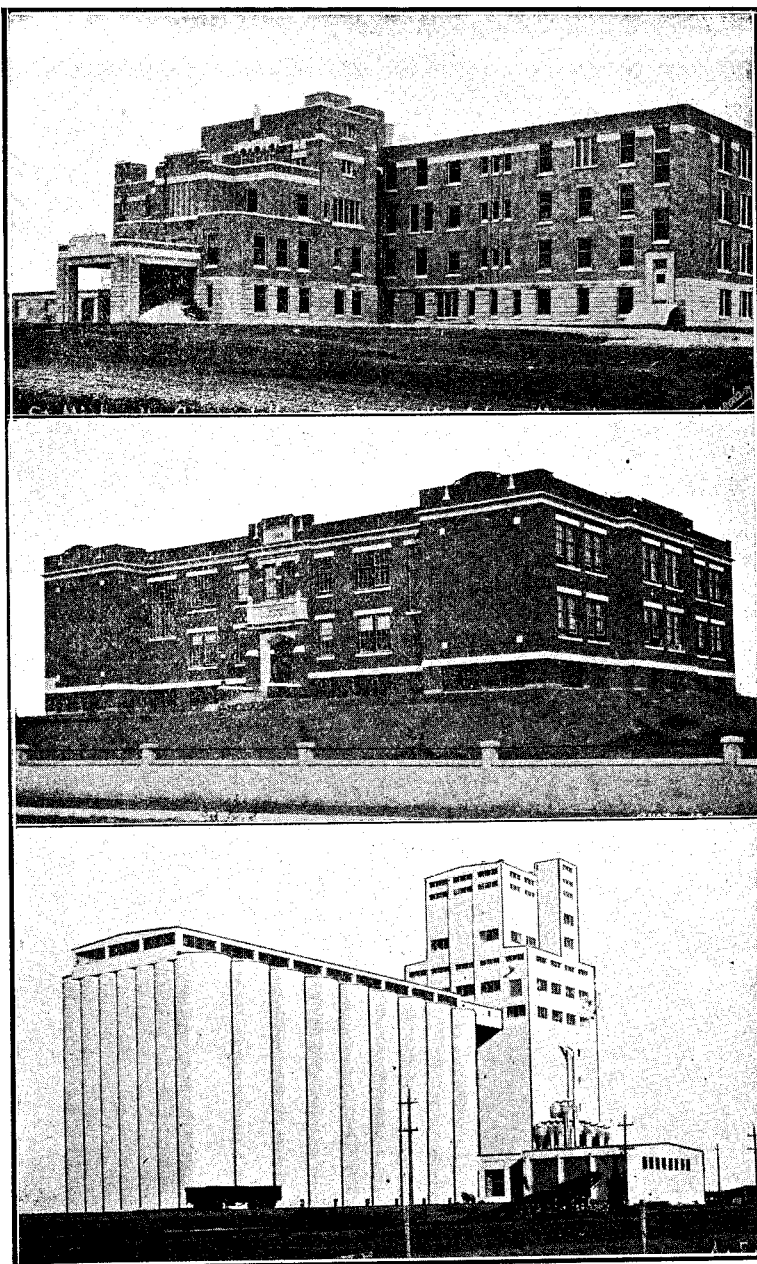

The value of co-operation between town and country is nowhere more appreciated than in Lethbridge. The citizens, through the Board of Trade, have ever been active in the interest of the farmer, and anything that would assist in improving farming conditions in any way has always been strongly supported by the Board. Irrigation development, better roads, more convenient railways, proper educational facilities for children in the country are some of the movements in which the people of the city have been identified. It is not from a spirit of altruism that the people of the city have taken part in these and various other movements in favor of their neighbors in the country. In this inter-relationship between town and country both the farmer and the citizens have benefited in many ways.

Lethbridge is spoken of by the travelling public as being the most beautiful of all the prairie cities. It is clean and sanitary. It has three well kept parks covering 303 acres, the admiration of all. As the traveller steps off the train, the first thing that greets his view is a park or garden, covering ten acres, or four blocks, in the centre of the city. By getting on the street car and travelling eastward he passes through wide streets bordered by rows of trees and boulevards on each side, until he reaches Henderson Park, which covers 200 acres and contains a beautiful artificial lake nearly a mile long, on which there is sailing, rowing and swimming in the summer, and skating in winter.

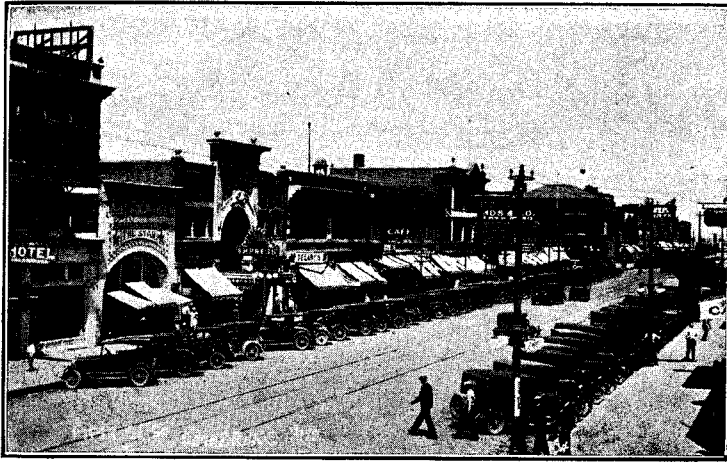

The street railways system, owned by the city, stretches over eleven miles, and there are two miles of paved roads.

The lighting system is by electricity supplied by a municipally owned power plant, which is one of the most up-to-date and economical in Western Canada, the fuel used being supplied by a municipally-owned mine within a stone's throw of the plant. This enables the city to sell electric current for lighting and industrial purposes at very attractive rates.

The telephone system embraces the latest models of automatic phones, and is owned and operated by the Alberta Government. The water supply comes from the Old Man River, which has its headwaters in the Canadian Rockies, and affords a never-failing supply of water. The water comes through an up-to-date filtration system, and is then forced up the banks of the river into large mains and distributed throughout the city. The waterworks are owned and operated by the city.

PUBLIC BUILDINGS AND ELEVATOR

FIFTH STREET SOUTH

This city has a fine class of school buildings for the 2,900 pupils. The schools are all constructed of brick, with stone or cement foundations. They are equipped with all modern conveniences, and consist of eight public schools, four Roman Catholic separate schools, one manual training school, one kindergarten school and one high school. Pupils from the Lethbridge schools have demonstrated the efficiency of the tuition provided by taking premier place in the provincial competitions.

Several Churches, representing the various denominations, care for the spiritual needs of the people of Lethbridge. Many of the church buildings are quite imposing edifices that would be creditable to the people of a much larger and older city than Lethbridge. The Y. M. C. A. headquarters is a large up-to-date building, with club rooms, swimming pool, dormitories, etc.

The size and style of the public buildings, banks, and many of the office blocks indicates a faith in the future, shared alike by the governments of the Dominion and the Province, the financial concerns, the merchants and the public generally.

The discovery of natural gas has lately provided another valuable attraction for Lethbridge. The city is well piped, the pressure is strong, the quality good and the cost to consumers very low.

This city is situated in the centre of a vast agricultural and coal mining area, and affords ample opportunities for the investor in various lines, such as mining, agriculture, dairying, milling, clay products manufacture, manufacture of flax products, soap manufacturing and various other lines.

Lethbridge commands the eastern entrance to the Crow's Nest Pass through the Rocky Mountains. Between the city and the mountains, for some seventy-five miles, stretches a fertile plain, the western border of the great prairies. Across this plain the mountains are easily visible from Lethbridge. Eastward the same wonderful prairie stretches to Winnipeg, and southward to the international boundary. The agricultural products of this vast and fertile prairie require an outlet to the Western United States, British Columbia, and through

FOURTH AVENUE SOUTH

the Pacific Coast ports to the world's markets. The most important channel for this commerce is through Lethbridge and the Crow's Nest Pass.

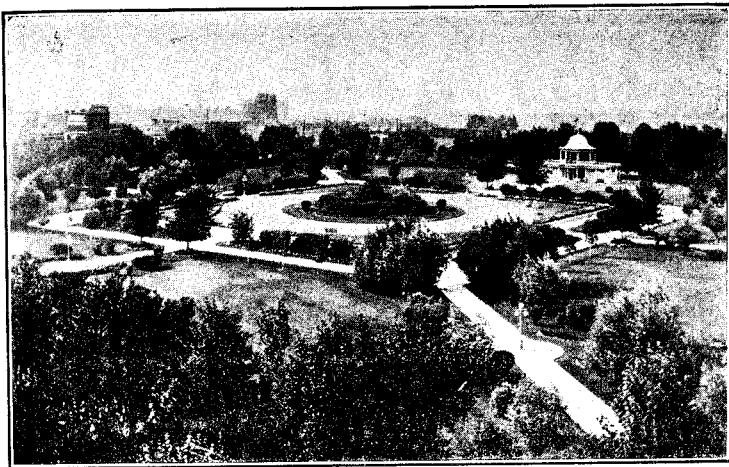

At Lethbridge, mills, elevators, factories, wholesale houses and stores required for the storage, manufacturing, marketing and shipping of this growing business are being provided as the traffic develops. The Canadian Pacific Railway completed its lines through the Crow's Nest Pass to Vancouver in 1916. This route from Winnipeg to Vancouver through Lethbridge and the Crow's Nest is shorter than the line through Calgary and the Kicking Horse Pass. The line through the Crow's Nest to the Kootenay and Columbia Valley country of British Columbia and via Kingsgate to the States of Washington, Oregon, and California now serves a large and growing traffic.

Fruit, produce, forest and mineral products from three localities, the imported merchandise intended for consumption by the rapidly increasing population of the great prairies are finding Lethbridge the logical gateway and the most convenient point for storage, assembling, assorting, marketing, and reshipping.

Lethbridge is likewise in command of a most important railway line to and from the United States via Coutts. The freer trade relations between Canada and the United States constantly promote the importance of this traffic. Lethbridge will also presently command the short line via Weyburn and Portal to and from Northwestern Canada and the Dakotas, Minnesota, and the Central United States.

AGRICULTURE

If the agricultural return for 1933 in Lethbridge district and the area served by the city of Lethbridge were to be taken by itself against the background of the decade from 1920 to 1930, and if the future did not hold hope of a brighter picture, the farming industry would be considered to be in a most serious plight. Annual reports of this Board of Trade for 1930, 1931 and 1932 have presented a tale of falling farm commodity prices in an unpleasantly realistic fashion. Fortunately the price structure of primary products showed some

GALT PARK

reversal of form in 1933. This fact helped to offset a very considerable decline in production, due to a summer season marked by less than normal moisture. The composite picture shows the lowest total farm wealth production in 1933 in the Lethbridge area for more than ten years.

A careful estimate of the agricultural wealth production in 1933 shows \$9,700,000 for grain products, \$6,400,000 for livestock, dairying and poultry products, and \$4,925,000 for sugar beets, potatoes, hay and other produce of the farms, or a total of \$21,025,000. This contrasts with \$21,760,000 in 1932, the year which was marked by the lowest unit prices in the history of agriculture in this part of the world.

As already intimated, the 1933 price structure, while still leaving much to be desired, was a very considerable improvement over 1932. This saving feature has really been the cause of considerable optimism in the face of a poor average crop. Whereas in 1932 the average price of wheat was about 32 cents at point of delivery, in 1933 the price ranged from 45 to 50 cents. This increase, reflected also in coarse grains, accompanied a very definite upward trend in the prices of hogs, sheep, wool and other livestock products, and a definite buoyancy is noted among the agricultural population as a result. It is well that this is so, for not since 1930 has there been a return from agriculture sufficient to pay the farmers' costs of operation, with the result that there has been an increase of debt, an increase in unpaid taxes, and a heavy drain upon farm equipment which has not been replaced as it has worn out.

Dry weather in late June, July and August, 1933, cut heavily into crop prospects which on the first of June were well above normal. A wet spring season had delayed seeding, and had cut down acreage to some extent. The drought which followed reduced the average per acre wheat yield to about ten bushels to the acre as against twenty bushels in 1932, and as against a sixteen bushel average over a term of ten or more years. With a ten bushel average return and a price of 45 cents a bushel at point of delivery it may be seen that the wheat

grower had a gross return of only \$4.50 per acre out of which to pay operating expenses, taxes and other charges.

Somewhat contrary to what usually obtains, the southwestern and foothill area of Southern Alberta was hardest hit by the drought, and the plight of the area northeast of Lethbridge was made worse by heavy frosts in mid-July and early August. In Southeastern Alberta crops averaged about normal owing to heavy rains in June and early July.

Coarse grains, and hay crops, too, were pretty much a failure, making the livestock feed situation serious as winter approached, with the result that some governmental relief in providing feed was necessary in some areas which usually have surplus hay for sale.

In spite of the untoward conditions, however, all sections of Southern Alberta have, as has been noted, a buoyant feeling. There is everywhere enough seed on the farms to put in the 1934 crop. In most instances there is sufficient feed for spring seeding operations, while the usual quota of land has been well summerfallowed, ready to receive the seed in the spring. With prices of agricultural products showing a steady tendency to rise, farmers are hopeful that they may be able to recoup their losses of the past three seasons over a term of years. There has been no movement away from the farms of Southern Alberta, and while farm land values are not strong, some land has been changing hands, indicating the general note of optimism.

The most disturbing factor in the agricultural situation at the present time is the suggestion that wheat acreages will have to be curtailed owing to lack of overseas markets for the product. The suggestion of a 15 per cent curtailment in wheat acreage has led farmers to ask what will be done with the land thus thrown back on their hands. In a good many instances some fraction of it could well be used for the growing of feed and pasture crops to supplement the supply ordinarily produced. There is no doubt that one of the weak points in Southern Alberta's agriculture has been the failure in the past to make provision for feed for the necessary farm stock on what are considered purely wheat farms. Two feed crops are coming into prominence at this time, crested wheat grass and sweet clover, while the area in corn is increasing each year. It is possible that a considerable area would be taken out of wheat and put into these crops if better livestock markets were in prospect. As it is, farmers will move slowly until both wheat and livestock market situations begin to clear.

It would be a serious oversight if this section of the Annual Report were to close without reference to outstanding victories scored by Southern Alberta farmers at national and international grain exhibitions during 1933. At the World Grain Exposition at Regina, Mr. Frelan Wilford of Stavely won the grand championship. At the Toronto Royal Winter Fair later in the year, the Smith Farms near Lethbridge won the national championship with a fine sample of Reward wheat grown on irrigated land following a crop of corn. At the Chicago International, Mr. George Bathgate won the championship in field beans, a new crop coming into prominence in the Lethbridge district. These results are very encouraging as showing that Southern Alberta farmers are more and more interesting themselves in putting quality products on the market.

The significance of these efforts to produce quality products lies in the fact that Canadians are today faced with the task of finding world markets in the face of determined opposition. It is not impossible that wheat restriction measures being contemplated will, in the not distant future, result in government curtailment of the export of low grade wheat. If that should prove to be the case, then Southern Alberta, lying in the brown soil belt of the prairies, where the bulk of high quality, high protein wheat is grown, will be in an enviable position if all farmers emulate the championship winners in 1933 in an effort to produce only the best wheat and other exportable products.

LIVESTOCK

Despite the fact that we entered the year 1933 with the lowest prices on livestock in Canadian history, the volume handled by the Lethbridge railway division of the Canadian Pacific Railway Co., shows an increase over the previous year, indicating that a large surplus of carry-over had moved out to market, cattle particularly showing the largest increase. The following are the 1933 figures with a five year comparison:

	1929	1930	1931	1932	1933
Horses	10,703	8,278	5,859	5,561	5,640
Cattle	42,690	41,430	41,783	33,699	58,120
Sheep	95,086	91,854	109,167	93,181	111,400
Hogs	67,512	76,333	72,015	69,715	66,195
	<u>205,991</u>	<u>217,895</u>	<u>228,824</u>	<u>202,156</u>	<u>241,355</u>

The movement of livestock through the Lethbridge stock yards shows a decrease from that of the previous year, indicating that more direct shipments moved from Southern Alberta, possibly to our export markets. The following are comparative figures in numbers of head and valuation:

	1930	1931	1932	1933
Hogs	51,713	59,129	54,155	45,712
Sheep	32,696	37,403	22,817	18,764
Cattle	3,393	6,490	5,089	4,086
Horses	891	491	545	567
	<u>88,693</u>	<u>103,513</u>	<u>82,606</u>	<u>69,129</u>
	Value			
Hogs	\$1,098,578	\$615,290	\$270,775	\$457,120
Sheep	245,320	187,015	45,634	278,850
Cattle	200,545	238,420	32,450	92,100
Horses	24,730	14,730	7,000	16,920
	<u>\$1,569,173</u>	<u>\$1,055,455</u>	<u>\$355,859</u>	<u>\$595,990</u>

Although the number of head decreased 8.4% the value for same increased 50.8%, being a welcome improvement over the previous year.

During the year just past there was a shortage of pasture on many of our ranges in Southern Alberta, coupled with a shortage of fodder and coarse grains, and this caused some anxiety amongst our livestock producers, especially many of our cattle ranchers.

Through free freight being introduced many cattle were moved to districts where feed was available, thus avoiding what looked like a serious loss in wintering.

Hog prices opened in January 1933 with bacon selling at \$2.65 per cwt., advancing in March to \$5.25. Prices rose steadily through the year, reaching a high in August of \$6.05. The closing in December was \$6.10. The average for the twelve months was \$5.35 per cwt. basis bacons, as compared with \$2.85 per cwt. basis bacons in 1932.

Fat lamb prices opened in January at \$3.75 to \$4.00, reaching \$4.75 the latter part of March, closing with the high figure of \$6.75. During the latter part of April and the month of May, Feeder Lambs, however, were lowest in history, selling at \$2.50 per cwt. This was due mainly to a shortage of feed, to the extent of most of our feeder lambs having to be shipped elsewhere for feeding, causing additional expense in transportation costs to purchases. Farmers on the whole are finding farm flocks of sheep valuable, and a noticeable improvement can be seen each year in farm flocks throughout the country.

Lethbridge Red Label Beef Association had an interesting year in 1933, fattening and finishing 2000 head of choice young cattle, and exporting the entire lot to the markets of Great Britain.

These cattle returned a profitable price to the producers and were a great credit to the Lethbridge district and Canada as a whole. This Red Label movement has now spread to Central and Northern Alberta.

IRRIGATION

The weather this season again demonstrated the need of irrigation. We started off with a wet March and April; May had about the usual two inches of rain, but June and July had about half the usual rainfall.

As a consequence the grain crops and hay, which gave promise in the latter part of May, of a fine yield, were cut down seriously during these last two months.

Those farmers who irrigated consistently, however, came through with excellent yields.

Alfalfa and sugar beets cannot be grown satisfactorily in this climate without irrigation.

THE LETHBRIDGE NORTHERN PROJECT

This project is located across the river north and west of Lethbridge. There are about 100,000 acres of irrigable land in this project, and it also includes, within its boundaries, several small thriving towns and one or two coal mines.

It is a co-operative project owned and operated by the resident farmers. The operation and colonization, however, are under the supervision of an official trustee appointed by the provincial government.

The average farm unit is the quarter section and the water is delivered at the headgate of each parcel of land. During 1933 a very heavy supply of water was used. This water was distributed in better manner than nearly any previous year.

Crop yields of cereals and hay were affected by grasshoppers. Many acres of grain were destroyed completely, especially barley and oats. In many cases the alfalfa crop was badly damaged with resulting low yield.

The sugar beet crop was the best in the history of the project, giving an average yield of 10.74 tons per acre.

There was a slight increase in the number of horses in the project, and a very considerable decrease in hogs. The quality of the cattle has been very considerably improved during the past year. This has been brought about by the use of high quality sires.

THE ALBERTA RAILWAY AND IRRIGATION COMPANY PROJECT

This project is located south and east of the Old Man River and east of the St. Mary River, adjoining the city. The gross irrigable area receiving water under this project is about 120,000 acres. It is owned and operated by the Canadian Pacific Railway Company and is about thirty-three years old. There are about 1000 water users on this project. This does not include the farmers on the three co-operative projects included in this system. These are the Taber Irrigation District, the Raymond Irrigation District and the Magrath Irrigation District, all of which were organized under the Irrigation Districts Act of Alberta and receive their water supply from this project.

This project is a well settled prosperous community.

TABER IRRIGATION DISTRICT

This project is located about thirty miles east of Lethbridge and has been in operation about thirteen years. This is a thrifty, prosperous community. They have reduced their bonded debt from \$16.00 per acre, which was the original cost, to \$11.28 per acre. The annual assessment in 1933, for all purposes, was \$2.20 per acre. One acre in every five in this district was in sugar beets last year, the average yield of which was 10.6 tons per acre with 18.4% sugar content.

THE CANADA LAND AND IRRIGATION CO. LTD.

This project is owned and operated by the above company. It is located about sixty miles north and east of Lethbridge. It has about 45,000 acres of irrigable land at present but it is only partly developed and there is still a large amount of excellent land open for settlement.

THE NEW WEST IRRIGATION PROJECT

This district is a small project organized under the Irrigation Districts Act of Alberta. It includes about 4500 acres which gets its water supply from the main canal of the Canada Land and Irrigation Company. It is owned and operated by the farmers but the operation is under the supervision of an official trustee appointed by the provincial government. The principal crops are grain and alfalfa.

THE UNITED IRRIGATION DISTRICT

This is a co-operative project owned and operated by the farmers under it. It is located about twenty miles northwest of Cardston and about the same distance south of Macleod. It contains about 36,000 acres. The principal crops raised are grain and alfalfa.

The experiment, under the supervision of the Dominion Experimental Station, Lethbridge, of growing head lettuce proceeded last

year and gave promise of being a very successful crop for this district but unfortunately the grasshoppers made a raid on the plants and destroyed the larger part of the main crop.

DAIRYING

The comparative figures in the accompanying tabulations of Alberta's dairy production indicate a $7\frac{1}{2}\%$ increase in the total value. The figure for creamery butter production constitutes a new record, and shows an increase of 13% over last year's, while the price shows an increase of nearly 5% over that of 1932. The factory cheese production is practically similar to that of last year, but the reported selling price shows an increase of $6\frac{1}{2}\%$.

The butter fat receipts at creameries during the eleven months period show an increase of some 13% in volume, and 8% in price. It will be noted, also, that cream quality has been well maintained during the year.

The returns so far received indicate an increase of 9% in the price of market milk.

The Bureau of Statistics report a slightly smaller number of dairy cows in the province, but it is believed that a larger percentage of them were actually milked, and their estimated annual production was somewhat greater than in former years.

Cream Grading Summary, 1933, Alberta

Butterfat in cream graded for eleven months ended Dec. 3rd, 1932, and eleven months ended Dec. 2nd, 1933 (48 weeks)

		1932		1933		
		Estimated Av. Price to Patrons		Estimated Av. Price to Patrons

Total Value			\$11,850,000

(x) The above figures include milk and cream for direct consumption, ice cream, home-made butter and cheese and skimmed milk.

MILLING INDUSTRY

The milling industry had a very favorable year as far as the quality of wheat is concerned. Most of the wheat was of good milling quality and the flour was very uniform throughout the year. The export business was much better during 1933 than in 1932, owing to the strength in the pound sterling. Export was increased 100%.

The domestic demand for flour has been very steady and has increased both in volume and tonnage, a good deal of the local flour going to Vancouver. The local mill has spent considerable time and energy in introducing new lines, such as self-rising flour and cereals. These have taken the place of a lot of imported and high-priced goods; goods which were too high in price for the food value that was in them. The success of these new lines has far exceeded their expectations. This not only makes use of home grown products but furnishes more work for local people.

Besides the flour manufacturing end of the business the local **plant owns and operates** a line of country elevators which acquire a steady supply of wheat the year around for the mill, besides handling the farmers' wheat at highest market prices.

With the increased interest in poultry raising and the increase in hog prices, it has been necessary to keep the feed end of the business up to date. The company carries a full line of poultry feeds and animal feeds, either ground or unground, as required.

ALBERTA SUGAR

A Review of the Beet Sugar Industry for 1933

There is one enterprise in Alberta, which, in the last few years, has made vast strides. So much so, that our province can be self-supporting, if the consumers and distributors of the province give their loyal support to its product. We refer to the Beet Sugar Industry, which is now producing over 90% of the Alberta consumption.

The successful growing of sugar beets is a function of our irrigated lands, because this vegetable must have, during the growing season, around twenty inches of water per acre. A large part of this moisture is necessary during July, August and September.

So expert have become the Alberta beet farmers that in 1932 they secured a yield of 10.82 tons of beets per acre, rivalling the crop in Ontario, where sugar beets have been grown for thirty years. This year the crop is lighter, running about 10 tons per acre, harvested.

The decreased tonnage is attributed to drought conditions in the summer, which irrigation could not wholly overcome, and even more to the dry weather of the harvest period, from September 15th to October 20th, which resulted in light weight beets, rich in sugar content.

The production of Alberta sugar for this year amounted to 46,260,600 pounds. The sugar content of beets also constituted a record, reaching 18.41%.

The present plant at Raymond, Alberta, was erected in 1925, and has been enlarged and improved several times since then.

This year the Factory handled sugar beets from 14,000 acres, which are grown by nearly 800 farmers, who employ 1500 workers.

The sugar company itself employs over 450 people during the receiving and manufacturing period of each year.

In 1933, plant operation commenced on September 21st, and the slicing of beets was finished about January 10th, 1934.

The problem of marketing the large annual production is now quite a serious one, because for many years, consumers have been educated to the belief that sugar refined from cane is superior to that refined from sugar beets. Such a notion is a fallacy, but it persists, regardless of advertising, publicity and education.

Note the following letter:

"I have seen several times, in the canning department of a popular farm monthly, advice to housewives to buy cane sugar for preserves, as beet sugar will not jell. I feel that, from unprejudiced people, who would naturally believe this true, you must lose large fall sales, and it is up to you to refute this as I know, from experience, beet sugar will jell, also it is far superior to cane sugar for cakes and fancy cooking. I have many times wished to express my thanks to you for a cheaper, better sugar. I am taking this opportunity to do so.

"Hoping you will not be offended by this, I am, yours truly,
(Signed) Mrs. C. V. McKenzie, Grassland, Alberta."

The final payment to beet growers for 1932 crop was \$5.83 per ton, and payments for 1933 are estimated to reach over \$6.25 per ton. Five dollars per ton has already been paid for 1933 crop beets.

On this basis of crop return, sugar beets, as a cash crop, have been the outstanding success of our agriculture in Southern Alberta for 1933.

There is naturally considerable agitation at the present time for the advantages of additional beet factories, but the marketing problem is one that requires serious consideration, and must be solved before further expansion takes place.

The sugar production of the district has been increased from 102,806 bags in 1928 to 462,606 bags in 1933, or 349.98% increase, and no other crop can show nearly the same progress.

This year the expenditures in connection with sugar beets will reach the following figures:

To farmers for beets	\$ 850,000.00
To labor	240,000.00
To railways and trucks	425,000.00
To mines	50,000.00
To quarries	16,000.00
To factories and supply houses (machinery, etc.).....	125,000.00
	<hr/>
	\$1,706,000.00

In this coming year 1934, Alberta will produce its tenth crop of sugar. There is every reason for every consumer to order only Pure Alberta Sugar, thus extending still further the wide benefits of successful home industry throughout the province.

DAIRY CALF CLUB

The Ayrshire and Holstein Dairy Calf Club members held their seventh annual competition during the summer Fair. There were eighty-seven dairy cattle exhibited, including junior calves, yearling, two-year olds and junior herds. As in the past, the standard in type, quality and condition was excellent and highly commented upon by the judges.

The members standing first and second in the various classes are as follows:

Holstein Junior Calf—

1. Glen Roy MetzgerMaybutt, Alberta
2. Tilley WebbLethbridge, Alberta

Ayrshire Junior Calf—

1. Edward N. LarterIron Springs
2. Leonard ElliottShaughnessy

Holstein Yearling—

1. Gordon NimmonsPicture Butte
2. Shirley DalglishIron Springs

Ayrshire Yearlings—

1. Allan JohnsonPicture Butte
2. Mae OberPicture Butte

Holstein 2-year olds—

1. Shirley DalglishIron Springs
2. Delbert PatchingMaybutt

Ayrshire 2-year olds—

1. Francis HaneyIron Springs
2. Mae OberPicture Butte

Holstein Junior Herd, Group of Three—

1. Stanley TiffenLethbridge
2. Ronald TiffenLethbridge

Ayrshire, Junior Herd, Group of Three—

1. Leota OberPicture Butte
2. Bernard NolanIron Springs

The Calf Club policy has served to place the foundation of a great many dairy herds of exceptionally high quality throughout the Lethbridge area and there has been approximately four hundred dairy cattle placed in the district through this policy, including increase.

The directors wish to express their thanks to the business firms and Service Clubs for the prizes which they have donated and for the general support given to the Club.

BEEF CALF CLUB

The junior livestock activity has gained for itself the enviable reputation of being the best club of its kind in the west. Inaugurated in 1924 by Mr. W. H. McIntyre, Mr. M. L. Freng and a number of associates, it is now in its tenth season with an enrolment of twenty-seven members.

Last July seventeen calves were presented for judging and sale at the Lethbridge Exhibition when \$1,105.50 was realized from the sale, making an average of 7.80 cents per pound live weight, more than double the open market price. The first prize calf fed by James Maclean of Kipp, sold for 19 cents per pound, the purchaser being Supina Mercantile, North Lethbridge. The runner-up was Charles W. Nicol of Kipp, a brother of the first prize winner. His calf was sold to Mr. R. W. Greenway, manager of the International Harvester Company, and president of the Lethbridge Board of Trade, for 10 cents per pound.

The finish of some of the calves was perhaps not so good as in former years, owing no doubt to financial difficulties in procuring feed, but on the whole the class made a very good showing.

The awards were placed with general acceptance by Mr. Alex. Macdougall, Shorthorn breeder, Champion, while the sale was called very successfully by Mr. Peter La Valley, our popular local auctioneer. The thanks of the directors and members of the club are due to the Lethbridge Exhibition Board and the breeders' associations for their co-operation in furnishing the prize money and to the business houses of the city for their generous support of the sale. The buyers were: Supina Mercantile, T. Eaton Co. Ltd., Burns & Co. Ltd., Independent Meat Market, Westminster Meat Market, Marquis Hotel and R. W. Greenway.

BEES AND HONEY

The total yield of honey in Alberta during 1933 is estimated at 1,000,000 pounds and nearly 88 per cent of this was produced in the irrigated areas mainly around Lethbridge, Taber and Brooks. Returns reported to the Provincial Apiarist from all of Southern Alberta south of Calgary show that 4,263 colonies yielded 879,328 pounds of honey or more than 206 pounds a colony, which is a very high average yield indeed, especially for so many colonies.

Moreover, this large crop of honey was of very high quality and was mostly of the fine grade of white honey that is gaining such a good reputation for Canadian honey on the British market, where it is used extensively for blending with the darker grades.

The long days of bright warm sunshine, especially during July and early August, provide conditions that are naturally favorable for honey production in Southern Alberta and particularly in the irrigated areas where moist soil conditions and a warm sunny atmosphere normally combine to produce an abundance of high quality nectar from the clovers and alfalfa that are extensively grown.

COAL MINING

The year 1933 has been a disappointing one for the coal industry of this district. The area in the southern part of Saskatchewan, which usually constitutes the main market for Lethbridge coal, suffered from extreme drought for the third year in succession, and most of the coal used there was relief coal. While the price of wheat increased somewhat, there was a short crop in Southern Alberta, and in Southern Saskatchewan there was practically no wheat to be marketed.

The output from the Lethbridge coal area for the year 1933 was 335,166 tons, which was 13.76% of the domestic coal output of the province which totalled 2,434,836 tons. This percentage is lower than any year for the past decade with the exception of 1924, when there was a long strike in this district, and even in that year the Lethbridge coal area produced 13.2% of the total output of domestic coal. There is no apparent reason for this drop in percentage except the crop conditions in Southern Saskatchewan, and the fact that in times of financial stress the demand for higher priced quality goods drops more than the demand for cheaper products regardless of the relative values. The total output of domestic coal is lower than it was in 1932, but higher than in 1931, and the total output of the province is also intermediate between the 1931 and 1932 outputs, being 4,715,502 tons.

Last year we stated that the future would show a steadily increasing competition from Saskatchewan lignite. Figure 1 shows the

total outputs of Alberta and Saskatchewan, and the output of Alberta domestic coal from 1924 to 1933 inclusive. It will be noticed that since 1929, while both the total Alberta and the Alberta domestic coal production have decreased materially, the Saskatchewan output has been steadily increasing. Saskatchewan produces a lignite coal; a fuel of distinctly lower quality than any of the competing coals from Alberta. Due, however, to natural conditions and a lower wage scale, the Saskatchewan coal can be mined more cheaply than Alberta coals, and it can therefore be marketed, within a certain radius of the producing fields, at a price which gives good value on a heat value basis compared with Alberta coals. The coal is not as attractive to handle as the Alberta coals, and it was not until the hard times forced people to put into practice every possible economy that the value of the Saskatchewan coal began to be widely appreciated. It is, in fact, altogether likely that Saskatchewan will continue to increase her coal production for a number of years, and mainly at the expense of the Lethbridge area.

While good crops and higher prices for farm products, particularly wheat, would no doubt improve the situation for the Lethbridge mines, we cannot, unfortunately, see a definite prospect of any great revival of trade in this field in the immediate future. Looking further ahead, however, there are possibilities of increased activity in this field. The Drumheller coal area appears to be definitely limited in extent, and from all appearances it seems probable that the coal production from that field will be definitely on the decline ten years from now, and possibly before that. Unless some new field, or some field at present only partially developed, takes its place, the Lethbridge, and possibly the Taber area will be the logical source of coal to fill the market which Drumheller is now supplying.

OIL AND GAS

The year 1933 saw considerable oil development in Southern Alberta but no new commercial fields were brought into production. The Red Coulee light crude field, on the Alberta-Montana border south of Lethbridge, continued to yield steadily but no extensions were made during the year. The Skov interests deepened the test well on the old Kotop lease. This well was on the west fold of the Red Coulee field, an area hitherto not explored. The venture was a failure, however, as only a small show of oil was found in the Sunburst sands and water in the Vanalta sands, producing zone of the border field. The producing area of the Red Coulee field is therefore becoming pretty definitely defined with the proven area lying close to the border.

In the other southern plains fields progress was made. In the Twin River field the Roney-Nordon well has oil and gas but at this writing a satisfactory test has not been made. Unfortunately the derrick was lost in a fire, this misfortune holding up completion. East of Coult's the Mayland interests did considerable drilling on the Reserve structure near Pinhorn but as yet the results are not known. The second well there has both oil and gas but whether the flow will prove commercial is not known.

At Comrey, Imperial Oil spudded a test well which should be finished in 1934. In the Kehoe Lake area the Hudson's Bay No. 1 well (Discovery well) has been on the pump making light production. It is confidently hoped that this promising area will come in for further

exploration in 1934. Skiff wells, making heavy crude, have remained capped during the year.

The Canadian Western Natural Gas interests have continued the re-pressuring of wells in the old Bow Island gas field and some five billions of feet of gas from the Turner Valley has been forced into these drained wells. The work is continuing.

Red Coulee oil production in barrels month by month for the year ending November 30, 1933, and those for the year 1932, follow:

	1932	1933
January	3,722	2,938
February	3,335	2,760
March	3,607	3,095
April	3,115	2,942
May	2,811	2,850
June	2,528	3,789
July	2,550	2,272
August	2,442	2,281
September	2,319	2,200
October	2,374	2,047
November	3,050	1,915
December	3,021	1,968
Total	34,877	34,078

It should be noted that a very small amount of Keho Lake oil is included in the above figures for 1933.

WHOLESALE

The Lethbridge district is well equipped with wholesale jobbing houses of all descriptions, and is therefore in close touch with manufacturers and producers of the many articles necessary to carry on the large number of enterprises and industries of Southern Alberta. Modern warehouses, with every facility to render the necessary fast service demanded by present day merchandising methods, form a considerable part of the trade centre about which the business of the territory turns.

The staffs maintained by them form a considerable factor in the regular payroll of the city—the establishment and enlargement of which is of prime importance to any urban community. Wholesale activities provide considerable revenue for the post office; their delivery services revenue for other businesses, and of course transportation companies derive the major portion of their earnings from the handling of wholesale shipments.

Cars of commodities are brought in by the local wholesalers, direct from the grower or manufacturer, and such goods are placed on the market at the lowest cost to the retailer. Complete stocks are carefully maintained, allowing the consumer to obtain as full a variety of commodities as in the larger centres of Canada. Local industry benefits through the marketing agency of the wholesaler, among the most important being Raymond sugar, mill products, cereals and breakfast foods, etc.

During the past year wholesale prices have shown a firmer tendency, and recently many staple lines have shown considerable advances, with a corresponding extra revenue to the grower or maker. When the producer of the raw materials obtains fair prices for his

output, there is a favorable reaction in all channels of trade—and at the time of going to press the jobbing houses sense a better “tone” to business, which it is hoped augurs well for the not too distant future. The year 1933 compared more than favorably with the previous period, and a comparison will demonstrate that in Lethbridge and district commodities are brought in, handled and marketed at prices competitive with those of any jobbing centre similarly located.

BUILDING STATISTICS 1933

During the year 1933 there were ninety-five (95) building permits issued by the city totalling \$54,398.00, compared with one hundred and four (104) permits in 1932, totalling \$192,150.

The classification of the 1933 permits was as follows:

6	Fully modern residences	\$11,000.00
3	Small houses without sewer	1,100.00
17	Private garages	1,650.00
	Elks' Club Rooms	10,459.00
	Alterations, additions and repairs	30,189.00

Total for the year 1933	\$54,398.00
-------------------------------	-------------

The only prominent building erected during the year was the Elks' Club rooms, on 5th Avenue South, between 6th and 7th Streets, which reflects great credit on the organization, and is a distinct asset to the district in which it is located, as well as to the city as a whole, and helped considerably to relieve the unemployment situation during the spring months of the year.

HIGHWAYS AND TOURIST TRAFFIC

During 1933 at least three associations closely connected with the Lethbridge Board of Trade were actively engaged with the object of having existing all-weather highways completed and maintained in a state of efficiency commensurate with the traffic thereon and with the development of increased tourist business.

For many years the Red Trail Association have concentrated their efforts on the completion of a modern motor highway across Western Canada from Winnipeg to the Canadian coast and have specially marked this road as the Trans-Canada Red Trail, featuring it as the only such highway in Canada passing through the scenic Canadian Rockies that is possible of being in use all the year round. This body, with Waldo Greenway as president and James S. Rose as secretary, again published the well known Red Trail map and distributed many thousands to tourist bodies and inquiring motorists. In addition they brought pressure to bear on highway departments of the Alberta and Saskatchewan governments with the object of having the last two unfinished links of this highway fully completed between Bow Island and Medicine Hat, Alberta, and between Walsh and Maple Creek, Sask.

The Sunshine Trail Association have sponsored a north and south highway from the Arctic Circle to Mexico and thus far have succeeded in having this highway constructed from Clyde, Alberta (50 miles north of Edmonton) to Salt Lake City. The annual convention of this body was held last August in Lethbridge at which F. C. Kendall of Idaho Falls was elected president and James S. Rose secretary, and a strong publicity committee was formed, charged with

the intensive advertising of this highway and its adjacent beauty places.

The southern branch of the Alberta Motor Association with offices in the Sherlock Building was able to offer to the motoring public greatly increased services during 1933. Their territory was enlarged and now reaches from Wardner, B.C., on the west, to the Alberta-Saskatchewan border on the east, and from Claresholm, Carmangay and Suffield on the north to the international boundary on the south. With E. R. J. Forster as president and James D. Dobson as secretary the endeavor of this association has been to have "accredited" hotels, garages, service stations, restaurants and tourist camps appointed and advertised for all towns and cities located on gravelled highways in the district, so that in case of trouble or need the local or visiting motorist may always be within reasonable distance of the service afforded by these "official" appointments. In addition many thousands of road maps have been distributed and information has been broadcast over CJOE and published through the courtesy of the Lethbridge Herald, so that the motoring public might at all times know of the weather and road conditions.

The Lethbridge Tourist Camp, which is the property of the City of Lethbridge, and is beautifully located in Henderson Park, near the junction of the east and south entrances to the city, has been under the supervision of Mr. Geo. Cropley and has been reconditioned and improved in so far as funds were available. During the tourist season 896 autos containing 2924 passengers registered at the camp and many more were turned away due to inadequate accommodation. It is hoped that increased and improved accommodation will be forthcoming for the season of 1934. Due to the completion of that part of the Sunshine Trail between Coutts and Great Falls during last fall it is anticipated that there will be greatly increased tourist traffic visiting Lethbridge from the territory served by this highway, and plans have been prepared for the erection of several more cabins as well as a new community kitchen at the Lethbridge tourist camp, so that all who visit it may be made happy and comfortable.

The Logan Pass highway in the Waterton-Glacier International Peace Park was opened for traffic at a monster picnic held on July 4th at the summit of Logan Pass and attended by about 4000 motorists, including a large number from Lethbridge and other points in Alberta. Though the work on the eastern end of this highway was not completed until late last fall, it led to greatly increased traffic of tourists from Alberta points through the port of Carway.

The four ports of entry in Alberta and southeastern British Columbia show the following numbers of cars and passengers passing inward and outward during the past season as compared with those of 1932:

COUTTS, ALBERTA

	1933	1932
American automobiles reporting inwards	11,955	17,265
American automobiles reporting outwards	11,982	17,350
Canadian automobiles reporting inwards	17,769	17,295
Canadian automobiles reporting outwards	17,758	17,248
Passengers reporting inwards	58,758	79,618
Passengers reporting outwards	58,794	79,880

CARWAY, ALBERTA		
American automobiles reporting inwards	3,074	4,057
American automobiles reporting outwards	2,696	3,743
Canadian automobiles reporting inwards	1,454	1,081
Canadian automobiles reporting outwards	1,392	1,073
Passengers reporting inwards	14,736	16,320
Passengers reporting outwards	13,844	15,513

KINGSGATE, B. C.		
American automobiles reporting inwards	1,603	2,113
American automobiles reporting outwards	2,087	2,492
Canadian automobiles reporting inwards	2,834	3,191
Canadian automobiles reporting outwards	3,700	3,762
Passengers reporting inwards	14,338	16,582
Passengers reporting outwards	18,736	18,904

RYKERTS, B. C.		
Cars reporting inwards	6,983	6,322
Cars reporting outwards	6,056	5,960
Passengers reporting inwards	22,449	19,799
Passengers reporting outwards	19,601	18,701

It is worthy of note that there was a slight increase in the number of Canadian cars passing through these ports over those of 1932, while there was a marked falling off in the number of American cars so passing.

Civic Administration

CIVIC OFFICIALS

Mayor—Robert Barrowman

Manager—J. T. Watson

Aldermen—D. H. Elton, K.C., W. L. McKenzie, K. D. Johnson,

A. Smeaton, W. Ripley, R. W. Greenway.

Henderson's Lethbridge Street and Avenue Directory 1934

First Ave. (N.)

HENDERSON'S (1934) LETHBRIDGE

First Ave. (S.) 57

NOTICE

♦ The Symbol following the residence name, indicates that to the best of our knowledge someone living in the house is the owner.

✱ This Symbol indicates that a telephone is located at this number on the street.

This new Home Owners, Tenants and Phone Directory is compiled from information taken on a special house-to-house personal canvass. We do not guarantee to be absolutely correct in every detail, but we believe it to be very accurate and complete, as far as it has been possible for us to get the information personally from someone at each residence. Where occupants have been absent the "owner" information has been left out.

FIRST AVENUE (North)

Runs from Fifteenth Street north-east to city limits.
